## EDUCATION

### University of Calgary

*Bachelor of Science in Computer Science, Specialization in Software Engineering*

Calgary, AB

Sept. 2018 – Nov 2022

## EXPERIENCE

### Full-Stack Developer

Jan. 2023 – Present

*HV Logic Ltd.*

Calgary, AB

- Develop and maintain proprietary business management software using React, NodeJS and MongoDB
- Set up and maintain Linux development and production environments and pipelines
- Collaborate with mid to high-level management and cross-functional teams to implement seamless solutions
- Implement coding standards and code quality assurance processes, resulting in higher-quality software
- Conducted in-depth research to identify and address gaps in existing software, resulting in significant progress

### Backend Developer

May 2022 – Nov. 2022

*Reach Ltd.*

Calgary, AB

- Contributed to the design, development, testing, and maintenance of microservices and API gateways using Java Spring Boot in a Linux environment
- Developed efficient scripts in Bash and Python to streamline team workflow and increase productivity
- Created innovative asynchronous notification handling components for a WooCommerce payment plugin in PHP
- Wrote comprehensive tests using JUnit, Mockito, RestAssured, and MockServer, which significantly improved code maintainability, reliability, and coverage
- Developed an internal service for API testing, which reduced technical debt and financial strain on the company

### Backend Developer

Sept. 2021 – May 2022

*University of Calgary (Capstone)*

Calgary, AB

- Worked on a distributed team to build legal software for my Software Engineering concentration with React, Node.js MySQL, Docker, and Redis in a Linux environment
- Dockerized solution for easy development and deployment
- Participated in iterative requirements gathering and project scoping
- Wrote an official user and programmer documentation for the product
- Presented a fully functional product to stakeholders including lawyers and professors

## PROJECTS

### FasterXML Jackson-databind | *Java, JUnit, Javadoc, Maven*

Oct. 2022 - Nov. 2022

- Implemented a procedure to parse JSON entities to Java objects and wrote accompanying JUnit tests
- Wrote and published accompanying Java documentation for implemented changes
- Opened a pull request which was successfully merged into the main repository, providing code to be used by 1M+ applications worldwide

### MMA API | *Node.js, Express, Docker, MongoDB, AWS*

Dec. 2021 – Jan. 2022

- Developed a web scraper in Node.js to obtain, parse, clean and store statistics on past and present fighters
- Created an accompanying REST API in Express to allow for the programmatic retrieval of the data
- Containerized the application for ease of deployment
- Deployed the service using an AWS EC2 instance

### OneApp | *HTML, CSS, Javascript, Django, Bootstrap, Postgresql*

Sept. 2020 – May 2021

- Led a team of fellow undergrads as a project manager
- Built a web application to handle and centralize web notifications from different platforms, receiving second place at the yearly showcase
- Deployed the solution on the web using the Heroku cloud application platform

## TECHNICAL SKILLS

**Languages:** Java, Python, C/C++, SQL (Postgres), JavaScript, PHP, HTML/CSS

**Frameworks:** React, Node.js, Spring Boot, Flask, JUnit, Mockito, Django, Material-UI, Bootstrap

**Developer Tools:** Git, Docker, Redis, MongoDB, AWS, VS Code, IntelliJ, Maven, Gradle, npm

**Libraries:** pandas, Matplotlib, Express
